DETAILED ACTION

Response to Election Requirement

Claims 1-15 are pending.

Claims 1-10 and 14-15 are withdrawn.

Applicant's election without traverse of Group II in the reply filed on January 10, 2007 is acknowledged.

Double Patenting

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 11-13 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 11-13 of copending Application No. US 2005/0215536

Art Unit: 1616

A1. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Chwalisz et al. (WO 01/26603 A2).

Chwalisz et al. teach a method of treating a gynaecological disorder (female contraception) comprising administering to a patient a SPRM, such as J867, for a first dosing period. See pages 5 and 6. The second dosing period comprises administering at least one progestogen, such as, gestodene, progesterone, etc. See page 11. Chwalisz further teaches that mesoprogestins (a SPRM) can be used sequentially with a progestin. The mesoprogestin component is administered for a period of 1-30 days (first dosing period) whereas the progestin component is administered for a period of 30-180 days (second dosing period). See page 5. The progestins used are gestodene, progesterone and levonorgestrel, etc. See page 11. The selective progesterone receptor modulator (SPRM) compounds used are J867, J912 and J 956. See page 6.

Objection

Claim 11 is objected to because of the following informalities: the claim is an improper Jepson claim. Appropriate correction is required.
